Educational Programs for Architectural Door Openings

The global leader in door opening solutions

**ASSA ABLOY**

Join CSI Fresno for an overview of the door opening technology options available today and trends developing for the future. You will leave with an understanding of technology to help you make decisions to maximize your physical security investment and improve your overall return on investment. The Speaker, Larry Fosnight, will discuss applications and code related strategies. Presentation objectives:

- Introduction of the options available in door opening security today
- Discussion on managing door opening technology in specification sections
- Review of emerging trends
- Discussion of codes related to physical security

**Presented by: Larry Fosnight , ASSA ABLOY**

Larry Fosnight is an experienced physical security consultant who works for ASSA ABLOY. In his career he has helped design the mechanical and electronic security of airports, government agencies, healthcare facilities, higher education, and major corporate campuses. His expertise includes door openings, electronic access control, fire and life safety codes, and accessibility compliance.

**Join us at the PESC Offices:
